# Hostile takeover mass effect game walkthrough guide download

## Amaranthine Mercenary Base

When you arrive, you'll notice that the outside of the base is well-guarded by some human and Turian guards. You can find safety on either side of the door, and what's more, the door can be shut, isolating your party from the enemies (at least temporarily) if you need to rest, heal, or let any of your Powers regenerate. Pick either "Not a problem" or "I'll do it" for +2 Renegade Points. Ultimately, no matter how you end the conversation (even if you "refuse" to go through with it), you'll get the coordinates to the crime bosses' two bases strewn throughout the galaxy, and the option to go after them. The surface of the planet is easy enough to navigate. This will give you some XP for the hack!

Regardless of this, you can also start the Assignment by finding and talking to Helena Blake in the Financial District on the Presidium. That means you'll get the Morality Points for picking the Persuasion options AND XP and Loot for killing Helena and the Mercenaries! This does mean you cannot meet Helena later on in the trilogy, however. If you do decide to fight, keep in mind that a shield will be put up in the doorway; you'll need to shoot it to make it go down, much like the hexagonal shields the Geth use. Secure Weapons Locker - Average Decryption. Prerequisite: Present Evidence to Saren in Citadel; Expose Saren II Location; Serpent Nebula - Widow - The Citadel - Presidium - Financial District - Emporium. The best way to get this Assignment is actually to go to the C-Sec Offices on the Citadel. This Assignment has a unique structure because it is dealt with in four parts: you pick it up on the Citadel, progress it on Mavignon and Klensal, and conclude it on Amaranthine. Getting up to it requires you to vault up to a smaller crate. This page of IGN's Mass Effect wiki guide is all about the UNC: Hostile Takeover Assignment Side-Quest, including where to find all the items, how to survive the combat encounters and how to make the choices for your playthrough. The mercenaries here are more cautious than the second base, but deal a high amount of damage. It'll be entirely undefended, so it really is as simple as driving down to it, exiting the Mako, and entering through the front door. Persuasion Points: N/A Minimum Decryption: Average Decryption Minimum Electronics: Hard Electronics Location: Hades Gamma - Dis - Klensal Your next destination will be Hades Gamma, located just East of Gemini Sigma and South-East of Attican Beta where Feros is. Technician Kit - On some shelves on the South wall of the upper side-room, to your right when standing in the doorway. Otherwise, you'll end up wasting time leaving this place, when you'll just have to come back to eliminate any left stranded. These Essential Stats cover the entirety of the Assignment and the Uncharted Worlds they're on; we have part-specific stats as well for convenience. If this happens, you must still make sure everyone is killed, until you get an on-screen prompt that tells you the Crime Boss is defeated. Because of this, keep consulting your map to make sure you're headed in the right direction. In a nebulous environment like this, your map is your best friend. Note that while the map shows a Northern side room at the back of the main chamber, you can't actually access it. Persuasion Points: N/A Minimum Decryption: Hard Decryption Minimum Electronics: Medium Electronics Location: Gemini Sigma - Han - Mavignon The first world you should go to is Han, in the South of the Gemini Sigma cluster (located North-East of the Horse Head Nebula where Noveria is). Presented by the U.S. Army You'll need to take out three automated Heavy Turrets outside of the base first before you can enter. In addition, the terrain here is rough, and the bad weather makes it easy to get turned around. Pick "Then we're fine" or "You better stay clean" to leave her be for +2 Renegade Points, as well as some Credits payment (more than if you fight it). You can still choose "No" after this to fight Helena and her band for XP, loot and credits. The head of the crime has several layers of shields and regenerates health, which requires him to continually hurt so that he does not regenerate. Persuasion points: 10 Charm / 7 Intimidate Minimum Decryption: Difficult Design Minimum Electronics: Prerequisite: Kill the crime bosses on Mavignon and Klensal Location: Horse Head Nebula - Fortuna - Amaranthine With both dead crime bosses, now you're gonna have to meet Helena Blake in an engineering outpost. Because of this, you could really kill the head of the crime before you killed all his men. Directly in front of you when you enter this room. The Engineer Outpost is located in the southern part of the area, marked with a 2 on the map above. Some of them are located in sniper towers with some heavy guns, while others are running around willy-nilly and are rather easy to choose from. Speaking to Helena, you will find that you have a lot of information to collect from her, and she will inform you of two rival bosses, and how they have to be deleted both. Medical Kit - Even behind a large box, a little further away from the closed door. When the coast seems clear, it almost is. Here's what each of the options will do: If you have 10 Charms, choose "Accendi" to try to reconsider Helena for +8 Paragon points. Medical Kit x2 - On the shelves on the right of the Crato Secure Malfunctioning Object - Set in the south-east corner of the room. With everything open, exit the hiding place, enter the Mako, then zip back to Normandy. Trust us when we tell you you don't want to be part of it. But that blocks you from the building, which means you can't get any of the barrels inside. If you want to have your cake and also, choose one of the persuasion options, then can be chosen "no" to fight it. A Garrus, pick another strong Squad Mate like Wrex or Ashley (the latter of which is also good with Sniper Rifles). The Crime Boss here is indiscriminate with his own well-being, joining the fray as soon as he can. Look for the side-room with some C-Sec Officers on break; in the back will be a Computer Console you can hack, assuming Shepard or a Squad Mate is capable of Hard Decryption. Helena herself proves to be the most annoying foe because of her biotic abilities that can knock Shepard onto the floor, but remember that all enemies must be killed here in order to continue, not just Helena. Regardless of how this Assignment ends, be sure to ransack the outpost for the following loot items (unless you agreed with Helena, in which case you'll be locked out of the building and be unable to get back in): Lower Floor: Technician Kit - Behind a large box across from the locked side-room door. Once you've gotten to the mountain's apex, you can easily locate the base. When all three guns are destroyed, you should then approach the facility, get out of the Mako right in front of the entrance, and run inside of the research facility quickly, before you take any cold weather damage. Before landing on Amaranthine, make sure to sweep the Fortuna system of these Discoveries: Stellar Object Side Quest Subset Type Maganlis (1st planet) Turian Insignia Turian Emblem N/A Thrumlon (3rd planet) Valuable Minerals Rare Element Plutonium Once you have them, land on Amaranthine, the third planet in the system. You'll be given the Assignment no matter what you do, but there are Morality Points to earn: Pick "No, I won't do this" for +8 Paragon Points. If you're following our Citadel Assignment Cleanup, after picking this up you'll want to move on to Presidium Prophet. South-West room: Secure Crate - Average Decryption. If you want, tackle everything else on Mavignon for XP, Credits and Assignments! Don't exit the Mako here unless you have - There is a two-level danger that will make enormous damage if you are not careful. Therefore, this page is divided into three parts, helping to find any discovery in every part as we usually do. Your best bet is to stay in the first room and let the enemies come to you. When you enter the structure, you will meet Helena after opening the door to the main room. Try to let them come to you when you can, keeping your party stationary and waiting for an enemy to reveal itself. The main central chamber is the only position in which the enemy has to face, and all the enemies have to face here, in order to be ready to fight. The earth is frozen, and it can be explored at your convenience, but it is probably better to head straight to the target, marked with a 2 on the map above. KIT UPDATE - On the back of the large pile of boxes where the chief of crime was. To do this, inspect the weapons, then approach the low case and press the Interact button (X on PlayStation, to on Xbox.) To the left of the rescue station. The base is located on top of a huge mountain, and is only reasonably accessible from the south-west side. After entering, you will be safe until you enter the main chamber of mining tunnels, where the rest of the crime union is waiting for you. Medical station - In the south-eastern room, on the east wall. Traveling to DIS in the north-west area, then sweep the system of these discoveries: Stellar Object Side Quest Subset Type Nearrum (2 A ° planet) Asteroid metal metal of the titanium of precious minerals Valuable Minerals Light Metal Lithium Raysha (5 ° planet) Turian Insignia n/a n/a once you have them, land on Klensal, the third planet of the system. To get there, he travels to the horse nebula where he is news, but instead of going there, enter the luck system in the part of the cluster. Unless you are playing Legendary Edition and wanting to avoid XP's penalty, using the Mako cannon is easily the best best to take everyone out. The map above of the hideout will help you navigate the area easily. Your best bet is to stay in the safety of the little nook you find yourself in when you enter the room. Lather, rinse, repeat. Hardened Wall Safe - Hard Decryption. Before touching down on Mavignon, make sure to sweep the system for the following Discoveries: Stellar Object Side Quest Subset Type Paravin (1st planet) Asari Writings Matriarch's Writings N/A Patantans (5th planet) Valuable Minerals Light Metal Beryllium You'll want to land on Mavignon, the second planet in the system. Persuasion Points: 10 Charm / 7 Intimidate Minimum Decryption: Hard Decryption Minimum Electronics: Hard Electronics Heavy-hitting Squad Mates with lots of health will assist with the Mercenaries you'll face. Upper

Floor: Aid Station - In the upper side-room, in the corner to the left of the entry door. Combined with the right of the entry door. Garrus is a very good choice, particularly because the Mercenaries have snipers that he can counter with his own Sniper Rifle talent. When he's finally killed, you can then explore. Otherwise you'll have to use a Sniper Rifle, but if you can't use them well, you're gonna have to suck it up and get in close. Helena is standing outside the Emporium and will call to you as you pass by. To the left of the Secure Weapons Locker:When you've killed everyone and gathered everything, head back outside, and then "beam back up" using the Mako, or continue exploring Klensal. When you're ready, head into the chamber and get ready to fight. When he does, unload all you have on him and wait for the next to arrive. Medical Kit - Found on top of the crates close to the entrance of the main chamber. Remember that while you can get out of the Mako safely here without any hazards to make you nervous, the Mako provides you with an incredible amount of defense that is unmatched otherwise.
